

Molecular Biology

Vocabulary

| | |
|---------------------|----------------------------------|
| agarose gel | Agarosegel |
| amplification | Amplifizierung, Vervielfältigung |
| base pair | Basenpaar |
| centrifugation | Zentrifugation |
| centrifuge | Zentrifuge |
| encode | kodieren |
| exon | Exon |
| experiment | Experiment |
| gene expression | Genexpression |
| heterozygous | heterozygot |
| homozygous | homozygot |
| incubation | Inkubation |
| intron | Intron |
| kinase | Kinase |
| labelling | Markierung |
| ligase | Ligase |
| ligation | Ligation |
| marker | Marker/ Standard |
| mutation/ mutant | Mutation/ Mutante |
| nucleic acid | Nukleinsäure |
| oligonucleotide | Oligonukleotid |
| optical density | optische Dichte |
| phosphorylase | Phosphorylase |
| pipette | Pipette |
| pipette tip | Pipettenspitze |
| polymerase | Polymerase |
| power cord | Stromkabel |
| power supply | Stromversorgungsgerät |
| precipitation | Präzipitation |
| primer | Primer |
| probe | Probe, Sonde |
| reaction tube | Reaktionsgefäß |
| recombination | Rekombination |
| replication | Replikation |
| restriction | Restriktion |
| sequence | Sequenz |
| signal transduction | Signaltransduktion |
| standard | Standard |
| transcription | Transkription |
| translation | Translation |
